
Data & Society Research Institute

Data & Society is a New York City-based research institute dedicated to addressing social, technical, ethical, legal, and policy issues that are emerging because of data-centric technological development. Data & Society provides a space for researchers, entrepreneurs, activists, policy creators, journalists, geeks, and public intellectuals to gather, debate, and engage one another on the key issues introduced by the increasing availability of data in society. Data & Society brings together divergent constituencies, hosts events, does directed research, creates policy frameworks, and builds demonstration projects to grapple with the challenges and opportunities presented by an ever-increasing amount of available information. For more information and to subscribe to the Data & Society mailing list, visit <http://www.datasociety.net/>

The Leadership Conference

The Leadership Conference on Civil and Human Rights is a coalition charged by its diverse membership to promote and protect the civil and human rights of all persons in the United States. Through advocacy and outreach to targeted constituencies, The Leadership Conference works toward the goals of a more open and just society - an America as good as its ideals. For more information on The Leadership Conference and its 200-plus member organizations, visit www.civilrights.org

New America's Open Technology Institute

The Open Technology Institute strengthens communities through grounded research, technological innovation, and policy reform. We create reforms to support open source innovations and foster open technologies and communications networks. Partnering with communities, researchers, industry and public interest groups, we promote affordable, universal, and ubiquitous communications networks. For more information, visit <http://www.newamerica.org/oti/>
